Table of Contents:

1. Health Professions Week - April 22-26
2. Bio Sci 3rd Year Orientation - Required for 2nd Year & 1st Year Transfer Students
3. UTEACH: Develop and Teach Your Own Class at UCI - Apps due June 7
4. Trauma Research Associates Program (T-RAP), Apply by May 15
5. Research Opportunities
6. Human Biology Major Night - May 16
7. Annual UC Survey of the Undergrad Experience - Chance to Win a Gift Card!
8. UCI Center for Neuropolitics - Upcoming Lecture - May 3
9. Pre-Health Workshops for S’24
10. Summer Fellowship available to Bio Sci and Exercise Science Majors
11. Medical Assistant Job Opportunity
12. TRIO Scholars Peer Tutor - Apply by April 28
14. Nursing Science Change of Major Info Sessions
15. Women in Science Society Club Info
16. Recruiting LGBTQ+ Students for Study
17. Undergrads Wanted for Research Study
18. Helpful Resources

1. Health Professions Week - April 22-26

• Health Professions Week - April 22-26
• Summer Fellowship available to Bio Sci and Exercise Science Pre-Health Workshops for S’24

18. Helpful Resources
Dear students:

UTEACH is a program that enables undergraduates to design, develop, and teach their own lower-division seminar at UCI.

UTEACH courses can be taught by students from any major. Our current classes cover a vast and lively range of topics, including the Physiology of Superheroes; the Eco-Narratives of Studio Ghibli; Transmedia Storytelling; Shakespeare in High School; the United Nations; Treaty Design; Southeast Asian Gangs; History and "Hamilton"; Warfare and the Making of Modern Greece; Literature of the Vietnam War; and Reproductive Justice.

3. UTEACH: Develop and Teach Your Own Class at UCI, Apps due June 7

As a current 2nd year student OR 1st Year Transfer student, we will be reviewing with you the Bio Sci academic curriculum for your remaining quarters at UCI. This workshop will provide important information needed for you to be a successful junior Anteater!

This session will be led by Bio Sci Academic Advisors on various dates in-person below. This is a MANDATORY session. Not attending a 3rd Year Orientation will result in a hold on your account that will hinder your ability to enroll for Fall 2024.

Please RSVP for the session you will attend here.*

*If you have trouble accessing the form, please visit the BioSci live chat.

---

7. Annual UC Survey of the Undergrad Experience – Chance to Win a Gift Card!

Participate in the annual UC survey of the undergraduate experience, and win a gift card.

---

6. Human Biology Major Night – May 16

Our Human Biology professor, Dr. Nick, will be giving a presentation. Any student majoring in Human Biology or want to learn more about what Human Biology is and what this major has to offer, come join us!

---

5. Nursing Science Change of Major Info Sessions

Women in Science Society Club Info.

---

4. Trauma Research Associates Program (T-RAP), Apply by May 15

The Blumberg Lab is broadly interested in the study of gene regulation and intercellular gene-environment interactions, epigenetics, obesity, diabetes and metabolic disease. More information about the lab can be found here: lab.bio.uci.edu/

The Department of Developmental and Cell Biology's Blumberg Lab is seeking 2-4 Bio-199 Undergraduate Researchers Interested in Movement Disorders.

To apply, you must be a current sophomore or junior student and have a 3.0 GPA in your major. You will have the opportunity to work with the lab for one year, beginning in May 2024.

The Blumberg Lab is currently looking for bright and motivated UCI undergraduates to join our research team!

If interested, please submit a short personal statement and why you want to join the lab, a CV, and an unofficial transcript to jruiztej@hs.uci.edu.

2. Bio Sci 3rd Year Orientation – Required for 2nd Year and 1st Year Transfer Students

Congratulations! You are almost halfway through your undergraduate degree here in the School of Biological Sciences.

As a current 2nd year student OR 1st Year Transfer student, we will be reviewing with you the Bio Sci academic curriculum for your remaining quarters at UCI. This workshop will provide important information needed for you to be a successful junior Anteater!

This session will be led by Bio Sci Academic Advisors on various dates in-person below. This is a MANDATORY session. Not attending a 3rd Year Orientation will result in a hold on your account that will hinder your ability to enroll for Fall 2024.

These Clinical Research/Volunteer Opportunity – UCI Med

---
Applications for the 2024-25 UTeach cohort will open soon. If you are interested in applying, please attend one of our upcoming information sessions. These sessions will provide an overview of UTeach, go over the application process, and give you a chance to ask any questions you might have about the program. UTeach Info Sessions will be held on the following dates and times:

4. Trauma Research Associates Program (T-RAP), Apply by May 15

BIO 199 Clinical Research Opportunity!
The Trauma Research Associates Program (T-RAP) at the UCI Medical Center is currently looking for bright and motivated UCI undergraduates to join our research team! The application deadline to submit is May 15th, 2024 at 11:59 pm after which interview invites will be sent out. T-RAP requires a minimum 1-year commitment and 4 units of Bio Sci 199 credit during the school year. To learn more or to apply to our program, please visit our website to fill out an application! Students of sophomore or junior standing are preferred.

Website: https://ucitraps.wixsite/home
5. Research Opportunities

Bio 199 Research Opportunity to Study Diabetes, Obesity, and Gene-Environment Interactions

The Department of Developmental and Cell Biology’s Blumberg Lab is seeking driven, enthusiastic Bio-199 undergraduate researchers with strong interests in gene-environment interactions, epigenetics, obesity, diabetes and metabolic disease. More information about the lab can be found here: https://blumberg-lab.bio.uci.edu.

The Blumberg Lab is broadly interested in the study of gene regulation and intercellular signaling during embryonic development. They are studying the relationship between exposure to endocrine-disrupting chemicals and obesity/diabetes and the epigenetic processes underlying the effects. Students will have the opportunity to work with animals and at the bench, and will have the autonomy to start personal research projects in the future.

Students would start this summer and are expected to commit 20 hrs/wk throughout the summer and the academic year. Nearly all students who work in the lab for an extended period of time have co-authored publications.

If interested, please submit a short personal statement and why you want to join the lab, a CV, and an unofficial transcript to blumberg@uci.edu.

-----

Seeking Bio-199 Undergraduate Researchers Interested in Movement Disorders

The Laboratory for Neurophysiology and Deep Phenotyping is currently seeking to recruit two enthusiastic undergraduate students for our Bio-199 lab. https://undergraduate-research.bio.uci.edu/list

Our work is dedicated to identifying biomarkers in Parkinson’s Disease, track the progression and characterize its neurophysiology. You will have the opportunity to work with a highly interdisciplinary team, interact with patients and contribute to the field of movement disorders. To apply, you must be a current sophomore or junior student and plan to enroll in Fall Quarter 2024. We are requiring a time commitment of 9 hrs/week.

If you are interested, please submit a brief statement about you and why you want to join as well as an email a copy of your resume/CV and unofficial transcript to Jesus Ruiz at ruiztej@hs.uci.edu.

Deadline to apply is Friday, May 3rd at 11:59 PM.

-----

Seeking Undergraduate Researcher(s) Interested in Structural Biology and Immunology

Our lab studies how novel proteins function in the context of innate immunity. Pertaining to this position, we study how proteins originating in bacteria which are now in fungi have since been repurposed by their new organisms. An undergraduate researcher(s) in the lab would assist in the preparation, expression, and purification of these proteins as well as their structural determination (figuring out how they look in the cell) via X-ray crystallography.

We’re looking for 1-2 students who would be available to come to the lab for somewhere between 5 to 10 hours per week for stretches of at least 3 hours at a time. Previous protein science experience would of course be preferred, but is definitely not required. Priority will be given to students with prior lab experience!

If you are interested, please contact Ali Nabhani at nabhania@uci.edu. The deadline to apply is May 6th.

6. Human Biology Major Night - May 16

Human Biology Club will be hosting a Human Biology Major Night on Thursday of Week 7 (May 16th) from 7-8 PM at HIB 110. If you are interested in specializing in Human Biology or want to learn more about what Human Biology is and what this major has to offer, come join us! Our Human Biology professor, Dr. Nick, will be giving a presentation about the major and answer any of your questions. We will also be providing pizza for dinner, so bring a friend and we hope to see you there!
7. Annual UC Survey of the Undergrad Experience - Chance to Win a Gift Card!

Participate in the annual UC survey of the undergraduate experience, and win a gift card!

Your feedback on the UC Undergrad Experience Survey helps faculty, advisors, and administrators from across the UC system understand and improve programs for our students.

Plus, every week nine survey participants will win a $50 Amazon.com gift card. When the survey closes, one grand prize winner will win a $250 Amazon.com gift card!

Take the UCUES Survey now!

8. UCI Center for Neuropolitics: Upcoming Lecture - May 3

Guess who’s coming to dinner in 2024?
How Partisan Identity Politics is Taking Over America

Darren Schreiber, PhD, JD
Senior Lecturer in Politics
University of Exeter

Friday, May 3, 2024
Noon – 1:15 p.m. PT

FREE Virtual Event
Registration Required
The past twenty years have demonstrated the role of biology in our political predispositions, with evidence from twin studies, genetics, and brain imaging. Recent trends have highlighted political polarization on an emotional, identity-driven level where the other side is seen as a hated enemy. The consequences have ranged from increasing dissatisfaction with democracy to a rise in violent extremism.
